Name That Gas Field

Monkey: You already know that corn is grown in a cornfield, and cane is grown in a cane field. But I'd bet you didn't know that natural gas is found in a gas field!

Iguana: Most of our gas fields are found off the southeast coast and the north coast of Trinidad. All of them have names, especially the names of flowers, trees, birds, places and animals.

Can you guess the names of some of these fields? I've given you a few hints; all you have to do is fill in the blanks.

1. This bright green forest animal looks like a big lizard.

--U---

2. This bright red flower is Trinidad and Tobago's national flower.

-----N--

3. This big, strong forest tree provides beautiful lumber for building houses and making furniture.

T---

4. This sea creature sounds like it should be twinkling in the night sky, but actually, it makes its home in the sand.

S-----

5. Be careful! This yummy preserved fruit might stain your fingers.

R_ _ _ _ _ G _

6. This tall, pretty tree bears pink or yellow flowers in the dry season.

--U_
